

(a) WRONG NAMESPACE

RHELM

Q Which seasonal ingredients did Monica choose at the market?

USE

Ripe strawberries, fresh basil, heirloom tomatoes, and rainbow chard.

KEEP - scope, policy, and lifecycle pass

DROP

Smoked trout and greens felt connected to the morning at the market.

DROP - wrong namespace + policy block

Topic overlap cannot authorize another principal's memory.

(b) SUPERSEDED STATE

MemOps

Q What Lisbon departure date belongs in my out-of-office reply?

DROP

The Lisbon departure is March 7.

DROP - lifecycle conflict + policy block

USE

The airline confirmed the original March 14 flight is going ahead.

KEEP - scope, policy, and lifecycle pass

A current-state query must not revive an invalidated value.

(c) USER-FORGOTTEN DETAIL

MemOps

Q Which phone details remain usable after my forget request?

DROP

I keep the battery between 20 and 80 percent; AccuBattery shows 100 percent health.

DROP - lifecycle conflict + policy block

USE

Forget battery health and charging habits; keep model, storage, color, date, and carrier.

KEEP - scope, policy, and lifecycle pass

The forget instruction remains usable; the forgotten detail does not.

(d) HISTORY QUERY NEEDS OLD STATES

MemOps

Q How did my metformin timing change over time?

USE

Initially: breakfast and dinner.

old state | kept for history

USE

Then: breakfast and an afternoon snack.

old state | kept for history

USE

Now: back to breakfast and dinner.

current | checks pass

Superseded evidence is still admissible when the query asks for history.

VERIFICATION LAYER

ranked candidate IDs

scope

policy

lifecycle (q, t)

USE / DROP + reason-coded trace

Known violation: exclude | unresolved: report unknown | old state: keep only when query-compatible
